

ACHEMA 2018: Demand for superfine mesh from GKD

Innovative weaves underline solution expertise

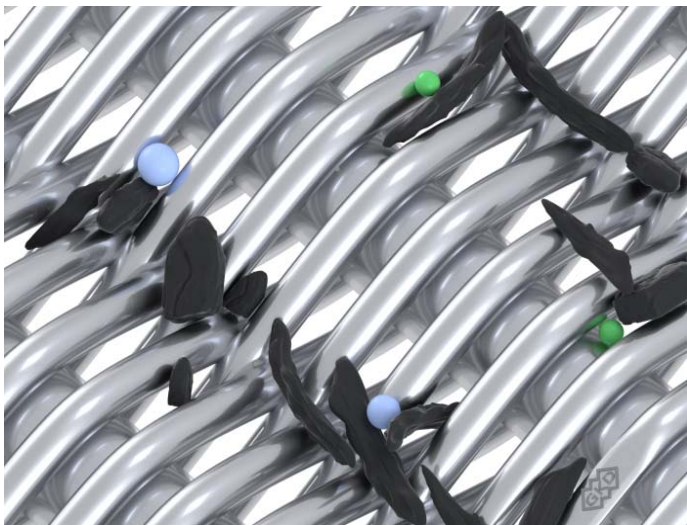

WORLD WIDE WEAVE

Picture 1: The multiple-award-winning, high-performance Porometric mesh combines unparalleled high permeability with equally good cleaning characteristics.

Picture 2: This model compared the flow rates of a typical plain dutch weave with Porometric mesh and optimized dutch weaves (from left to right).

Picture 3: The GKD mesh ODW6 combines this extreme separation rate with the high throughput required for large-scale water processing and qualifies itself for the battle against microplastics.

Picture 4: GKD developed this sampling basket for fractionation of particulate material larger six micrometers.
